

# Industry Day

## Careers Portfolio

 LOCATION: On school site
  DURATION: 1 day
  GROUP SIZE: 100

### About the programme

This employer-led Industry Day provides young people with hands-on activities to increase their knowledge and understanding of vocational careers in their local area.

Employers from a variety of industries deliver a range of practical experiences, creating a platform to raise students' awareness of potential progression routes and work-related learning opportunities. Included within the day, students will also receive current labour market and recruitment information to support them in making career choices and build confidence to make informed decisions about their future.

### Background

Our Industry Day programme gives students the opportunity to meet professionals from a range of industry sectors and find out about current labour market trends. During the programme, they will gain information and knowledge about progression routes and the recruitment processes for specific industries. During the hands-on sessions, they will have the opportunity to experience real-life working scenarios.

### Focus areas

- Labour market trends.
- Broadening horizons.
- Recruitment processes.
- Keynote speakers from industry sector professionals.
- Experience real life working scenarios.

### Programme aims

- To learn about current market trends in the local area.
- To identify progression routes into employment.
- To learn about recruitment processes for specific industries.
- To engage in discussions with industry professionals about vocational careers in the local area.
- To experience and apply skills to real life working scenarios.
